Profile

Self-taught Software Engineer focused on building fast, scalable, and user-friendly Web & Mobile applications. I can turn the product ideas into production-ready solutions by using the modern JavaScript/TypeScript frameworks, optimized backend services, and clean UI/UX. I ship real features, solve real problems, and constantly push my skills forward with the latest tools in Full Stack, Cloud, and AI-driven development.

Education

Pillai HOC College of Engineering and Technology <i>Bachelor of Engineering in Computer Engineering</i>	11/2022 – 05/2025 Khalapur, Raigad
Pillai HOC College of Engineering and Technology <i>Diploma in Computer Engineering</i>	06/2019 – 06/2022 Khalapur, Raigad

Skills

• HTML5	• CSS3	• JavaScript	• TypeScript
• Python	• Dart	• Tailwind CSS	• React
• Next.js	• Vue.js	• Svelte	• React Native
• Flutter	• REST APIs	• GraphQL	• Node.js
• Express	• NestJS	• FastAPI	• Django
• Flask	• PostgreSQL	• MongoDB	• Redis
• Firebase	• AWS	• Microsoft Azure	• GCP

Professional Experience

Vserv Digital Services Pvt. Ltd. <i>Software Engineer</i>	08/2025 – 12/2025 Mumbai, Maharashtra, India
• Built responsive and modern user interfaces using HTML5, CSS, Tailwind CSS, and JavaScript, with a focus on clean UX and performance. • Developed dynamic, component-driven frontends using React.js for scalable feature delivery and faster UI updates. • Designed, queried, and optimized MySQL relational databases to ensure fast and reliable data operations. • Created and integrated REST APIs to enable smooth communication between client-side and backend services. • Containerized and deployed applications using Docker to ensure consistency across development and production environments.	

Projects

HireSense – Smart Remote Job Finder with AI-Powered Career Matching [🔗](#)

A full-stack job discovery platform for browsing remote opportunities and analyzing skill matches.

- Built a full-stack AI-driven remote job discovery platform using React 19 + Go, delivering a fast, intuitive UX for browsing verified remote roles across global markets.
- Implemented intelligent career matching with MongoDB + OpenAI, analyzing user skills, experience, and preferences to generate personalized job recommendations.
- Designed secure, scalable backend APIs in Go, enabling real-time job ingestion, skill scoring, and seamless frontend-backend communication.
- Enhanced performance and user engagement through optimized queries and smart caching, ensuring low-latency recommendations and a smooth job-hunting experience.

Bloggen – AI-Powered Blog Writing Platform [🔗](#)

A full-stack blogging tool for generating, editing, and publishing SEO-optimized blog posts with AI assistance.

- Built an AI-powered blogging platform using Next.js 16 + TipTap Editor, delivering a smooth writing experience with rich text editing, custom blocks, and responsive UI.
- Integrated Laravel 12 backend for secure content management, enabling draft saving, publishing workflows, and persistent blog data across sessions.
- Connected Groq AI APIs for ultra-fast content generation, assisting users with blog writing, rewriting, and SEO-focused enhancements in real time.
- Implemented real-time SEO scoring and analytics with optimized queries, improving content quality insights while maintaining low-latency performance.

MindMerge – Synchronized Thinking, One Note at a Time [🔗](#)

A real-time collaborative note-taking platform for live editing, user presence, and workspace management.

- Built a real-time collaborative note-taking platform using SvelteKit, enabling live editing, shared workspaces, and a fluid writing experience across teams.
- Integrated Fastify backend with WebSocket-based synchronization, supporting instant updates, user presence, and cursor tracking across connected clients.
- Designed role-based access and workspace management with PostgreSQL, ensuring secure collaboration, permissions control, and structured data integrity.
- Optimized real-time performance using Redis for in-memory state and caching, minimizing sync latency and maintaining a seamless multi-user experience.

Roofly – Explore Homes, From Anywhere [🔗](#)

A modern real-estate listing platform with map-based property discovery and advanced search filters.

- Built with Nuxt 3 + Leaflet for map-based property discovery, enabling interactive listings, smooth navigation, and immersive home exploration.
- Developed NestJS backend with MySQL and Prisma, delivering secure role-based access, advanced search filters, and reliable data management.
- Integrated image galleries, favorites, and real-time listing updates, improving user engagement and streamlining the property browsing experience.

Healio – Personal Health Dashboard with AI-Powered Wellness Insights [🔗](#)

A full-stack health tracking platform for monitoring habits, analyzing trends, and improving daily wellbeing.

- Built with Remix + Chart.js for an interactive health dashboard, delivering smooth data visualizations, habit tracking, and intuitive daily insights.
- Developed FastAPI backend with PostgreSQL, enabling secure health data storage, trend analysis, and reliable API performance at scale.
- Integrated AI-powered wellness insights and analytics, helping users identify patterns, improve habits, and make smarter daily health decisions.
