Profile

Self-taught Software Engineer focused on building fast, scalable, and user-friendly Web & Mobile applications. I can turn the product ideas into production-ready solutions by using the modern JavaScript/TypeScript frameworks, optimized backend services, and clean UI/UX. I ship real features, solve real problems, and constantly push my skills forward with the latest tools in Full Stack, Cloud, and AI-driven development.

Education

Pillai HOC College of Engineering and Technology <i>Bachelor of Engineering in Computer Engineering</i>	11/2022 – 05/2025 Khalapur, Raigad
Pillai HOC College of Engineering and Technology <i>Diploma in Computer Engineering</i>	06/2019 – 06/2022 Khalapur, Raigad

Skills

• HTML5	• CSS3	• JavaScript	• TypeScript
• Python	• Dart	• Tailwind CSS	• React
• Next.js	• Vue.js	• Svelte	• React Native
• Flutter	• REST APIs	• GraphQL	• Node.js
• Express	• NestJS	• FastAPI	• Django
• Flask	• PostgreSQL	• MongoDB	• Redis
• Firebase	• AWS	• Microsoft Azure	• GCP

Professional Experience

Vserv Digital Services Pvt. Ltd. <i>Software Engineer</i>	08/2025 – 12/2025 Mumbai, Maharashtra, India
• Build responsive and modern user interfaces using HTML5, CSS, Tailwind CSS, and JavaScript with a focus on clean UX and performance. • Develop dynamic, component-driven frontends using React.js for scalable feature delivery and faster UI updates. • Design, query, and optimize relational databases in MySQL to ensure fast and reliable data operations. • Create and integrate REST APIs for smooth communication between client-side and backend services. • Containerize and deploy applications using Docker to maintain consistency across development and production environments.	

Projects

ChatMate — Your On-the-Go AI Companion

A full-stack AI chatbot app enabling real-time, intelligent conversations across mobile platforms.

- Built a cross-platform AI chatbot using React Native + Tailwind-RN with seamless UX, custom themes, and responsive UI across iOS and Android devices.
- Integrated FastAPI backend + Firebase Auth for secure routing and persistent messaging synced across sessions and devices.
- Connected OpenAI APIs for context-aware responses, enhancing user retention with conversational memory and personalization.
- Optimized API calls with caching and efficient state management using Redux Toolkit, reducing message delivery latency.

Bloggen — AI-Powered Blog Writer

A modern SaaS platform that auto-generates SEO-optimized blog content with a clean authoring workflow.

- Developed a full-stack web app using Next.js + TailwindCSS with smooth animations and optimized dynamic rendering for high Lighthouse scores.
- Integrated Flask-based microservice on Azure to generate human-like articles using GPT models, ensuring fast and reliable content delivery.
- Stored blog metadata and author content securely on PostgreSQL hosted via GCP Cloud SQL, supporting scalable editorial workflows.
- Deployed frontend on Vercel and backend on Azure, applying multi-cloud architecture for improved reliability and performance.

HireSense — Smart Remote Job Finder

A job discovery app powered by AI-driven recommendations and modern cloud-native architecture.

- Engineered a React + Node.js + Express platform with Tailwind UI and smooth navigation for job search, filtering, and smart insights.
- Integrated OpenAI-powered suggestion engine to match users with relevant roles based on skills, history, and interaction behavior.
- Implemented AWS Lambda serverless backend with MongoDB Atlas for scalable search performance under varying user traffic.
- Added secure JWT authentication, automated cron-based job scrapers, and deployment on GCP for globally distributed access.

DailyXP — Gamified Habit Tracker

A productivity-focused mobile app using XP rewards, streaks, and tracking to build long-term habits.

- Built with React Native + Redux Toolkit for smooth gesture-driven UI, leveling system, and animated progress interactions.
- Developed Express.js backend with MongoDB Atlas on GCP Cloud Functions, delivering fast syncing and secure data storage.
- Integrated push notifications and real-time updates via Firebase to boost user engagement, retention, and daily activation rates.

BitPad — Fast Collaborative Code Editor

A browser-based development environment designed for instant code preview and sharing.

- Created an interactive web IDE using React + Vite + Monaco Editor, featuring multi-language code execution and collaborative editing.
- Built a Flask backend with Docker sandboxing deployed on AWS Fargate to isolate compute securely while scaling sessions efficiently.
- Implemented PostgreSQL persistence for user accounts and snippets, enabling reliable version retention and quick code retrieval.
